

RPA Developer

Name: BotCandidate1

Email : aashigarg2508@gmail.com

Mobile : +91-

OBJECTIVE:

To work in a quality environment, where my Knowledge, experience can be shared, enriched and to work as a key player in challenging and creative environment.

PROFESSIONAL SUMMARY:

- Total Experience: 3 years.
- 1.3 Years of experience in Robotics Process Automation (RPA).
- Working Experience in Automation Anywhere.
- Having Full-fledged knowledge on Metabots.
- Knowledge on Creation of Credential Manager.
- Adept in Robotic Process Automation Solution designing, Coding, Testing, Debugging and documentation.
- Used to analyze, understand and document the business processes in detail where required using tool like Automation Anywhere.
- Maintaining and modifying solution documentation.
- Supporting existing processes and implementing change requirements as a part of structured change control process.
- Working within project planning constraints, communicating any identified project risks and issues to the delivery/project manager accordingly and providing inputs to the change control process.
- Managing and investigating exceptions. (Business and System Exceptions)
- Problem solving issues that arise in day to day running of automation processes and providing timely responses and solutions as required.
- Excellent Cross Functional Skills with good analytical ability.
- Adaptive in nature and has zeal to learn new technologies.

- Proven track record of maintaining a very good relationship with clients and other Stakeholders.
- An effective communicator with excellent relationship building & interpersonal skills, strong analytical, problem solving.

EDUCATIONAL QUALIFICATION:

- Pursued Bachelor's degree accredited by **JNTU-Hyderabad** in the year of 2014.

PROFESSIONAL EXPERIENCE:

- Working as Software Engineer in **Cognizant**, Mumbai from June- 2014 to till date.

TECHNICAL SKILLS:

Languages	C#
Database	SQL Server 2008/2012.
Packages	Photoshop CS, Adobe Dreamweaver.
Web Technologies	HTML, JavaScript, JQuery .
Applications	Automation Anywhere
Knowing Technologies	BluePrism,DataStage

PROJECT1:

Title : HR Automation

Role : Developer.

Environment : Web Automation,Citrix environment,Window Automation, Email Automation, SQL Server Automation.

Description:

HR Automation is an automation of hiring employees and Termination Employees. SAP will generate employee files, files will be automated. To achieve this we used AACR, AAEC and SQL Server.

Roles and Responsibilities:

- Involved in Requirement Gathering and Analysis.
- Worked in Citrix Environment.

- Involved in Design Task bots based on Business requirements.
- Developed Task bots using Automation Anywhere Enterprise Client.
- Deployed Bots using Automation Anywhere Runtime Client.
- Used Metabots.
- Deployed the code in production, Support in Production run.
- Supported issues and tickets using Service now.

PROJECT2:

Project : Quote Automation
Client : Farmer Insurance
Environment : Web Automation, Window Automation, Email Automation, SQL Server Automation.

Description:

Objective of this project is to automate the process of registering “Offline” applications for insurance coverage. As part of this process, a new insurance coverage application document is reviewed, validated and then the application entry process is completed.

Roles and Responsibilities :

- Working in an RPA tool to design, develop and deploy automations to clients globally in collaboration with teams.
- RPA implementation using various tool for GUI based automation, Desktop based.
- Customized and developed reusable objects and reports highlighting process status for each record.
- Generated Email notifications and custom exception handling.
- Participate in the creation and ongoing refinement of an appropriately tailored RPA solution that provides the optimum platform for rapid and repeatable delivery of automated processes.
- Develop and document RPA configuration best practices, configure new RPA processes and objects using core workflow principles that are efficient, well structured, maintainable and easy to understand.
- Drive the strategic and tactical roll-out of the RPA solution to clients by creating and documenting test procedures and scenarios
- Handling change management, handling tickets, as a senior most professional involve in handling escalations.
- Support existing processes and implementing change requirements as part of a structured change control process as well as problem solving issues that arise in day to day running of RPA processes and providing timely responses and solutions as required.

PROJECT 3 :

Title : Sales Automation System
Client : Gateway, Irvine, US.
Role : Team member
Environment: Data Stage 9.1.

Description:

Gateway Health Care Benefit Services project is one of the very critical projects to the company. Purpose of United Health Care Benefit Services project is to provide the Health care benefits to the customers in UBS main applications are UHC services and CDB Eligibility and enrollment and web portal. To process the data for these applications Using Data stage and MSBI tools.

Roles and Responsibilities:

- Understand the user requirements, layout, and look and feel of the application to be developed.
- Created various filter like Quick, Context and Data Source filters as per Requirement.
- Designed Functions, Parameters and Sets.
- Worked with various Calculations as per Requirement.
- Designed the Different Types of Charts and Advance Charts.
- Worked with Maps, Custom Geo-Coding in Tableau.
- Designed Developed Dash Boards as per Requirement.
- Publish the reports into the server.
- Created Unit Test Cases and Documented the Unit Test Results
