RPA DEVELOPER

Name: BotCandidate2
Email: aashigarg2508@gmail.com
Mobile No: +91-

<u>**Objective**</u>:
Seeking a challenging position in the development of Applications where there is an opportunity to share, contribute and upgrade my knowledge for development of self and organization served.

<u>**Professional Summary:**</u>

➢ Relevant experience: Total Experience: 4 years.

• Development in **Robotic Process Automation** (RPA) using tools **Blue prism** and **Uipath.**
• Having knowledge on **Automation Anywhere**.

<u>**Experience Summary:**</u>

Currently working for **Capgemini** as a RPA Developer from Dec 2015 to till date

<u>**Academic Qualification:**</u>
• Bachelor of Technology from JNTU-HYDERABAD.

<u>**Technical Skills:**</u>

Tools   :   RPA (BLUE PRISM & AUTOMATION ANYWHERE)
Languages :   JAVA

Project #1   **: UK Collection– Robot Automation**
Client   **: AIG (American International Group)**
Technologies: BLUE PRISM

-Our client, AIG is a multinational insurance corporation providing services throughout 130 countries. This project includes various teams each working on different technologies. BLUEPRISM is one of the technologies amongst them. It is the desktop automation tool. Using BLUE PRISM, we have automated the manual tasks included like renewals, daily ledger accounts, issuance policies and so on.

Description: The process involves preparing Excel sheet copying data from group of sheets toa single sheet with a ROBOT procedure which means it works daily process from Task scheduler which can be run at a schedule time daily.
Automation can be used to eliminate the need to manually enter the details across multiple systems and navigate through different applications/tabs to reduce processing

time and error rates.
 Responsibilities:
- Gathering detailed requirements from Client for business requirements.
- Preparing Impact Analysis by analyzing the existing system for automation development.
- Preparing the design document about the automation process.
- Translating business requirements of business users / bureau needs into software requirements specs and design, develop, test and implement program changes to achieve the business goals of the users.
- Conducting unit testing and System testing.
- Facilitating Integration and User Acceptance Testing.
- Involved in deployment of automation in user's environment.
- Development of Batch Process for Duplicate Claim Name and BER.

Project #2   **: MEXICO HOME– Automation**
Client   **: AIG (American International Group)**
Technologies   **:** BLUE PRISM

Description: Mexico Home Automation deals with the process of booking a new policy and renewing a policy for Home Insurance Line of Business. It deals with verifying the eligibility of the policy prior to creation; processing the policy by renewing or creating it followed by uploading the supporting documents into One View document repository.
 Automation can be used to eliminate the need to manually enter the details across multiple systems and navigate through different applications/tabs to reduce processing time and error rates.
 Responsibilities:
- Gathering detailed requirements from Client for business requirements.
- Preparing Impact Analysis by analyzing the existing system for automation development.
- Preparing the design document about the automation process.
- Translating business requirements of business users / bureau needs into software requirements specs and design, develop, test and implement program changes to achieve the business goals of the users.
- Conducting unit testing and System testing.
- Facilitating Integration and User Acceptance Testing.
- Involved in deployment of automation in user's environment.
- Development of Batch Process for Duplicate Claim Name and BER.
